

DAVID AKINTOMIDE

Daveakin321@gmail.com | 087 702 6842 | Full Irish Driving Licence

PROFILE

Computer Systems graduate with experience in backend development, API testing, IT support and technical troubleshooting. Strong foundation in programming, databases and computer systems, with practical experience developing and testing APIs, investigating technical issues and working from product requirements and acceptance criteria. Comfortable learning new tools and systems, collaborating with technical teams and solving problems in changing environments. Interested in software engineering, QA/testing and other technology-focused roles.

TECHNICAL SKILLS

Programming: JavaScript, TypeScript, Java, SQL | Node.js, Express.js, React

Backend & APIs: REST APIs, API development, API testing | PostgreSQL, Firebase Firestore, Prisma

Tools: Git, Jira, VS Code, Workday

Systems: Hardware/software troubleshooting, system configuration, networking fundamentals

Concepts: OOP, MVC, JWT Authentication, database design, acceptance criteria

EXPERIENCE

OCTECH | Back End Developer – Internship | Jul 2026 – Present | Remote

- Contributing to a large-scale service platform covering payments, service management, user accounts and media.
- Developing and testing APIs supporting user accounts, service applications and core platform workflows.
- Testing API endpoints and application flows to identify issues and ensure reliable backend functionality.
- Contributing to API development based on product requirements, Jira tickets and acceptance criteria.
- Working on service agent registration, application submissions, drafts and application tracking workflows.
- Contributing to payment functionality and image/video upload and management features.
- Collaborating within a startup engineering environment on a large, continuously evolving platform.

EVERISE | Customer Service Representative | Jun 2025 – Jan 2026

- Used Workday and internal systems to investigate customer issues, manage account information and resolve problems accurately.
- Managed multiple customer cases while maintaining accuracy, attention to detail and service-level standards.
- Worked with pharmacy teams and other departments to resolve customer and order-related issues.
- Communicated clearly with customers through phone and digital channels.

ATLANTIC AVIATION GROUP | IT Intern | May 2022 – Dec 2022

- Provided IT support for desktops, laptops, software and networking issues.
- Installed, configured and maintained IT hardware and software.
- Troubleshoot hardware, software and connectivity problems for users.
- Assisted with updates, backups, security maintenance and workstation deployment.

PROJECT

Heartbeat – Music Player Web Application | React, JavaScript, Firebase

- Built a music player application allowing users to organise songs by mood and create playlists.
- Worked with application functionality, data storage and UI development while troubleshooting issues.

EDUCATION

University of Limerick — BSc Computer Systems | 2020 – 2024

Relevant areas included programming, databases, software development, systems analysis, networking and computer systems.

ADDITIONAL

- Full Irish driving licence (Category B).
- Comfortable working independently and as part of a team.
- Strong interest in software engineering, QA/testing, backend development and technology.
